

ROUTLEDGE

Routledge Psychology 2022 Key Titles Catalogue

Welcome

Welcome to our catalogue! Use discount code **CON08** through to September 10th 2022 to receive a 20% discount on all orders.

We are pleased to present a selection of key and new titles from the Psychology list at Routledge/Taylor & Francis.

This catalogue is divided into subject sections covering: Cognitive Psychology, Social Psychology, Developmental Psychology, Applied Psychology, Research Methods in Psychology, and a section highlighting our texts to support Introductory Psychology and CHIPS.

If you'd like to discuss your own new book project, please don't hesitate to get in touch with one of our commissioning editors. We'd be thrilled to hear from you!

eBooks

We have over 50,000 eBooks available across the Humanities, Social Sciences, Behavioural Sciences, Built Environment, STM and Law, from leading Imprints, including Routledge, Focal Press and Psychology Press. These eBooks are available for both individual and institutional purchase.

INDIVIDUALS

Our eBooks are available from Amazon, Apple iBookstore, Google eBooks, Ebooks.com, Kobo, Barnes & Noble, Waterstones, Mobipocket, VitalSource, and CourseSmart.

LIBRARIES AND INSTITUTIONS

Subscribe to or purchase a wide range of eBook packages or pick and mix your own from our complete collection (a minimum number of titles applies). FREE TRIALS are available. For more information, please visit www.tandfebooks.com or contact your local sales team.

eUpdates

Register your email at www.tandf.co.uk/eupdates to receive information on books, journals and other news within your area of interest.

Partnership Opportunities

We are continually seeking innovative ways to support and collaborate with the global scientific communities for which we publish.

If you or your organization would like to discuss partnership opportunities, email specialsales@taylorandfrancis.com.

Considering Books for Course Use?

Complimentary inspection copies are available for qualified lecturers considering a textbook for course adoption.

8th Edition • TEXTBOOK

Principles of Behavior

Richard W. Malott, Western Michigan University, USA and
Kelly T. Kohler

Known for both its narrative style and scientific rigor, *Principles of Behavior* is the premier introduction to behavior analysis. Through an exploration of experimental, applied, and theoretical concepts, the authors summarize the key conversations in the field. The text can also function as the first step in a student's journey into becoming a professional behavior analyst at the BA, MA, or PhD/EdD level. Each chapter of the text is integrated with the Behavior Analyst Certification Board (BACB) task list, serving as an excellent primer to many of the BACB tasks.

Motivation

Biological, Psychological, and Environmental

Lambert Deckers, Ball State University, USA

This textbook provides a complete overview of motivation and emotion, using an overarching organizational scheme of how biological, psychological, and environmental sources become motivation—the inducement of behavior, feelings, and cognition. It combines classic studies with current research and uses numerous real-world examples to engage students and make often-difficult theoretical concepts come to life. By understanding and applying the principles of motivation described in the text, students will not only discover insights into what motivates their own behavior but also how to instigate self-change.

Thought and Knowledge

An Introduction to Critical Thinking

Diane F. Halpern, Claremont McKenna College, USA and
Dana S. Dunn, Moravian College, USA

Thought and Knowledge applies theory and research from the learning sciences to teach students the critical thinking skills that they need to succeed in today's world. The text is grounded in psychological science and brought to life through humorous and engaging language and numerous practical and real-world examples and anecdotes. Critical thinking skills are presented in every chapter, empowering students to learn more efficiently, research more productively, and present logical, critical, and informed arguments. The skills are reviewed at the end of the chapter, and a complete list of skills with definitions and

examples are included in the appendix.

Cognitive Neuroscience of Language

David Kemmerer, Purdue University, USA

This text provides an up-to-date, wide-ranging, and pedagogically practical survey of the neural underpinnings of language. It guides students through all of the major areas of investigation, beginning with the fundamental aspects of brain structure and function and then following with key topics such as aphasia, the perception and production of speech, the meaning of words, morphology, syntax, discourse, reading and writing, sign language, and the bilingual brain. This edition has been thoroughly updated throughout, and now includes a dedicated chapter on the neural substrates of bilingualism.

4th Edition • TEXTBOOK

Human Memory

Gabriel A. Radvansky, University of Notre Dame, USA

Divided into three clear sections, this book provides an accessible introduction to the latest theory and theory on human memory. Beginning with coverage of the history of memory, the first section also introduces basic neuroscience and methodology. Core topics are then discussed, including sensory registers, mechanisms of forgetting, and short-term/working, nondeclarative, episodic, and semantic memory. The book concludes by looking at advanced topics in memory, such as formal models of memory, memory for space and time, autobiographical memory, memory and reality, and more. Full of student-friendly pedagogy, the book is an essential guide for all students of human memory.

The Student's Guide to Cognitive Neuroscience

Jamie Ward, University of Sussex, UK

Reflecting recent changes in the way cognition and the brain are studied, this thoroughly updated fourth edition of this bestselling textbook provides a comprehensive and student-friendly guide to cognitive neuroscience. This book will be invaluable as a core text for undergraduate modules in cognitive neuroscience and can also be used as a key text on courses in cognition, cognitive neuropsychology, biopsychology or brain and behavior. New material for this edition includes more on the impact of genetics on cognition and new coverage of the cutting-edge field of connectomics. Student-friendly pedagogy is included in every chapter, alongside an extensive companion website.

Thinking Visually

Stephen K. Reed

This book documents the many ways pictures, visual images, and spatial metaphors influence our thinking. The book discusses recent empirical, theoretical, and applied contributions that support the view that visual thinking occurs not only where we expect to find it, but also where we do not. Much of comprehending language, for instance, depends on visual simulations of words or on spatial metaphors that provide a foundation for conceptual understanding. It will be an essential read for all students and researchers interested in Visual Thinking.

An Introduction to Cognitive Psychology

Processes and Disorders

David Groome, (retd.) University of Westminster, London.

The new edition provides a comprehensive, yet accessible, overview of the field for undergraduate students. The fourth edition has been thoroughly revised throughout to provide a comprehensive introduction to the core topics of cognition, including memory, perception, thinking, and language. Uniquely, alongside coverage of normal cognitive function, the book also includes chapters on clinical disorders such as agnosia, amnesia, and aphasia, providing a more balanced insight into the nature of cognition and its related disorders. This book will appeal to all students on an undergraduate psychology degree course, as well as to those studying in related clinical professions.

Fundamentals of Cognitive Science

Minds, Brain, Magic, and Evolution

Thomas Hardy Leahey

Fundamentals of Cognitive Science draws on research from psychology, philosophy, artificial intelligence, linguistics, evolution, and neuroscience to provide an engaging and student-friendly introduction to this interdisciplinary field. Whilst structured around traditional cognitive psychology topics, the book also looks at cognitive neuroscience, embodied cognition, and magic to illustrate cognitive science principles. Using extended case studies to address the most important themes, this book is suitable for upper level undergraduate and graduate courses in psychology and related fields. Adaptive Learning and the Human Condition

Behavior Modification and the Helping Professions

Jeffrey C. Levy, Seton Hall University, USA

This book provides a coherent and comprehensive introduction to the basic principles of classical (Pavlovian) and instrumental (Skinnerian) conditioning. This edition has been thoroughly updated throughout, relating adaptive learning principles to clinical applications as well as non-traditional topics such as parenting, moral development, and the helping professions. The book showcases how an adaptive learning strategy can be practical, diagnostic, and prescriptive, making this an essential companion for psychology students and those enrolled in programs in professional schools and helping professions including psychiatry, special education, health psychology, and

physical therapy.

Charlotte L. Doyle

The Creative Process asks how celebrated works of art and breakthroughs in science came to be. What was the first inkling? What were the steps and missteps along the way? How was the process experienced by the creative person as it proceeded? And what are the implications for the psychology of the creative process? From Darwin's theory to an unusual jazz sound, here are 11 fascinating stories of how specific works took shape. Psychologists, students interested in creativity, and all those intrigued by the process from any creative field will find this book essential reading.

Cognitive Illusions

Intriguing Phenomena in Thinking, Judgment, and Memory

Edited by Rüdiger F. Pohl, University of Mannheim, Germany

Cognitive Illusions explores a wide range of fascinating psychological effects in the way we think, judge and remember in our everyday lives. In this volume, Rüdiger F. Pohl brings together leading international researchers to define what cognitive illusions are and discuss their theoretical status: are such illusions proof of a faulty human information-processing system, or do they only represent by-products of otherwise adaptive cognitive mechanisms? Demonstrating just how diverse cognitive illusions can be, it is a must read for all students and researchers of cognitive illusions, specifically, those focusing on thinking, reasoning, decision-making and memory.

AI vs Humans

Michael W. Eysenck, Emeritus Professor of Psychology in the psychology department at Royal Holloway University of London, UK and Christine Eysenck

The great majority of books on artificial intelligence are written by AI experts who understandably focus on its achievements and potential transformative effects on society. In contrast, *AI vs. Humans* is written by two psychologists (Michael and Christine Eysenck) whose perspective on AI (including robotics) is based on their knowledge and understanding of human cognition. At a time when human commitment to AI appears unstoppable, this up-to-date book advocates a symbiotic and co-operative relationship between humans and AI. It will be essential reading for anyone interested in AI and human cognition.

STUDENT REFERENCE

The Psychology of Comedy

G Neil Martin

Series: The Psychology of Everything

This book provides a unique insight into the role of laughter and humour in our lives. From the mechanics of comedy and what makes a good joke, to the health benefits of laughter, the book delves into different types of comedy, from slapstick to complex puns, and the physiological response it provokes. The dark side of comedy is also considered, confronting the idea that what is funny to some can be offensive to others, making this universal experience also highly subjective.

In a time when comedy continues to be one of the most popular and enduring forms of art, *The Psychology of Comedy* reminds us that laughter really is good for the soul.

Using Psychology and Neuroscience to Improve the Visitor Experience

Edited by Annalisa Banzi, University of Milano-Bicocca, Italy

The Brain-Friendly Museum proposes an innovative approach to experiencing and enjoying the museum environment in new ways, based on the systematic application of cognitive psychology and neuroscience.

It explores our universal cognitive processes and emotions, and how they can be used to engage with and enjoy the museum environment, regardless of the visitor's background, language or culture. The book considers core cognitive processes, including memory, attention, and perception, and how they can successfully be applied to the museum environment, for example, in creating more effective displays.

Analysis of Neurogenic Disordered Discourse Production

Theories, Assessment and Treatment

Anthony Pak-Hin Kong, University of Central Florida, USA

Analysis of discourse production among speakers with acquired communication disorders is an important and necessary clinical procedure. This book provides a comprehensive review and discussion of aphasia and its related disorders, their corresponding clinical discourse symptoms that speech-language pathologists should address, and the different methods of discourse elicitation that are clinically- and research-oriented. As the only introductory text to include comprehensive coverage of basic knowledge of neurogenic disordered discourse, it is a must-read for students, clinicians, and researchers in various fields.

An Introduction to Applied Behavioral Neuroscience

Biological Psychology in Everyday Life

Laura A. Freberg

An Introduction to Applied Behavioral Neuroscience explores the connection between neuroscience and multiple domains including psychological disorders, forensics, education, consumer behavior, economics, leadership, health, and robotics and artificial intelligence.

It is a must-read for all advanced undergraduate and postgraduate students in biological psychology, neuroscience and clinical psychology who want to know what neuroscience can really do to address real-world problems.

Israel Goldiamond

Series: Behavior Science

This book presents Dr. Israel Goldiamond's reflections on various ways we formulate behavioral and emotional problems, most often in traditional terms of mental health disorders, mental diseases or illnesses, psychopathological disorders, and so on – what he calls a pathological orientation. Here, Goldiamond argues for a groundbreaking alternative view from the vantage point of radical behaviorism. It will be a must read for anyone working in the analysis and clinical intervention in problems associated with mental health, or those more generally interested in the work of Israel Goldiamond.

The Déjà Vu Experience

Anne M. Cleary and Alan S. Brown, Southern Methodist University, Texas, USA

Series: Essays in Cognitive Psychology

The second edition covers the latest scientific discoveries that shed light on the mysterious phenomenon, considering the latest neurophysiological investigations and research on possible reasons why déjà vu is often associated with a sense of predicting the future or knowing what happens next. By placing the scientific study of déjà vu within its historical context and covering a broad range of perspectives on the subject, this title will be invaluable to upper level undergraduates, postgraduates and researchers of Cognitive Psychology, specifically those focusing on Memory Phenomena.

Bilingualism Across the Lifespan

Opportunities and Challenges for Cognitive Research in a Global Society

Edited by Wendy S. Francis, University of Texas at El Paso, USA

Series: Frontiers of Cognitive Psychology

This book explores the opportunities and challenges that are inherent in conducting cognitive research in an increasingly global and multilingual society. It illustrates how researchers of bilingualism leverage theory, methodology, and findings from single-language research, incorporate uniquely bilingual processes, and target populations of bilinguals that help to establish universal properties. Bringing together leading international contributors, the book provides the reader with a better understanding of the nature of bilingualism as it relates

to human cognition and is an essential read for all researchers and upper level students of bilingualism and cognitive psychology.

Brain Laterality

Up, Right, Forward

Kenneth M. Heilman

Brain Laterality answers one of the major questions we ask ourselves every day: where? The book provides a thematic, comprehensive overview of the brain mechanisms that influence whether we go to the left or right, on which side we stand, and which hand we use.

Featuring anecdotes from the author's own illustrious research and clinical career, this book is a must-read for psychology students, neuropsychologists, neurologists, and anyone interested in the brain's role in handedness, directional movement, intention, action, and posturing.

Handbook of Operant Behavior

Edited by Werner K. Honig, Dalhousie University and J. E. R. Staddon

Series: Psychology Press & Routledge Classic Editions

This classic edition of The Handbook of Operant Behavior presents seminal work in the field of learning and behavior, foreshadowing a new direction for learning research and raising many still unanswered questions.

In a newly written introduction, J. E. R. Staddon highlights several issues that deserve more attention: how language is learned, and syntax evolves, how animals choose, and a new paradigm for the study of learning in general. The book will be essential reading for all students and researchers of Learning and Behavior, encouraging researchers to revisit some of the fascinating behavioral questions raised by the original book.

Faith Through the Prism of Psychology

A New Framework for Existentialism

Eugene Subbotsky

Faith Through the Prism of Psychology introduces readers to the structure and function of the inherent ability of our Self to invest objects with reality – existentialization (EXON). The author moves away from traditional ideas of existence and faith, arguing that it is an inherent ability of an individual mind to invest entities (both objective and subjective) with reality.

It will be essential reading for anyone interested in existence from psychology, philosophy, theology or psychotherapy backgrounds.

Psychology for Sustainability

Britain A. Scott, University of St Thomas, Minnesota, USA,
Elise L. Amel, University of St Thomas, Minnesota, USA,
Susan M. Koger and Christie M. Manning, Macalester
College, Minnesota, USA

Psychology for Sustainability applies psychological science to so-called "environmental" problems that manifest when human behavior disrupts and degrades natural systems. This edition represents a substantial revision and expansion spurred by a burgeoning body of research and by global ecological, political, and social developments. Particular attention is paid to environmental justice and collective action for systems change. Timely topics include climate change, biodiversity loss,

environmental racism, Indigenous perspectives, social media, and Covid-19 and other pandemics.

Introduction to Political Psychology

Martha L. Cottam, Washington State University, Elena
Mastors, Washington State University, USA, Thomas Preston,
Washington State University and Beth Dietz, Miami
University

This comprehensive text explores the psychological origins of political behavior and introduces undergraduate students to a broad range of theories, concepts, and case studies of political activity to illustrate that behavior. It examines many patterns of political behaviors, including leadership, group behavior, voting, media effects, sex and gender, race, ethnicity, nationalism, social movements, terrorism, war, and genocide. New to this edition is coverage of the 2016 and 2020 US elections, conspiracy

theories, misinformation, fake news, Brexit, the Me Too movement, the Black Lives Matter movement, COVID-19, and global case studies including the Syrian crisis and North Korea.

Psychology of Prejudice and Discrimination

Mary E. Kite, Ball State University, USA, Bernard E. Whitley,
Jr., Ball State University and Lisa S. Wagner

Psychology of Prejudice and Discrimination provides a comprehensive and compelling overview of what psychological theory and research have to say about the nature, causes, and reduction of prejudice and discrimination. It balances a detailed discussion of theories and selected research with applied examples that ensure the material is relevant to students.

The theme of discrimination is developed via discussions of the nature of discrimination, the experience of discrimination, and specific forms of discrimination, including gender, gender identity, sexual orientation, age, ability, and appearance. The

concluding theme is the reduction of prejudice.

Women's Lives

A Psychological Exploration

Claire A. Etaugh, Bradley University, USA and Judith S.
Bridges, University of Connecticut at Hartford, USA, Emerita

Women's Lives integrates the most current research and social issues to explore the psychological diversity of girls and women varying in age, ethnicity, social class, nationality, immigrant experience, sexual orientation, gender identity, ableness and body size and shape. The text embeds a lifespan perspective within each topical chapter and has an intersectional approach that integrates women's diverse identities. It includes rich coverage of women with disabilities and on middle-aged and older women throughout. Taking a deeper transnational focus, it also examines the impact of social, cultural, and economic

factors in shaping women's lives around the world.

Psychology of Eating

From Biology to Culture to Policy

Emily Splane, Flagler College, Florida, USA, Neil Rowland, University of Florida, USA and Anaya Mitra

This text provides a multi-faceted introduction to the psychology of eating, looking at the biological, genetic, developmental and social determinants of how the human body is constructed to find and assimilate food. It juxtaposes normal eating, eating in environments of food scarcity, and the phenomenon of abnormal eating prevalent in many modern day developed societies. It also considers the role of business and government in creating eating cultures and potentially addressing the issue of abnormal eating. This is essential reading for undergraduate courses in Psychology and other disciplines with a holistic and critical thinking approach to the psychology of food intake.

Psychology of Music

From Sound to Significance

Siu-Lan Tan, Dept Kalamazoo College, USA, Peter Pfordresher, University at Buffalo, SUNY, USA and Rom Harré

This thoroughly revised new edition of *The Psychology of Music* combines a comprehensive summary with critical assessments of existing research. The contents range from basic-level perception to broader socio-cultural issues, capturing the interdisciplinary breadth of the field while covering the central topics in depth. For the new edition, the authors have expanded coverage to include non-classical forms of music, added more real-world connections, and included a new chapter on practical applications. The text will be invaluable to students in the area and anyone else interested in the psychology of music.

Practical Social Justice

Diversity, Equity, and Inclusion Strategies Based on the Legacy of Dr. Joseph L. White

Edited by **Bedford Palmer II**

Practical Social Justice brings together the mentorship experiences of a diverse group of leaders as they relay the lessons they learned from Dr. Joseph L. White through personal narratives, and share their best practices and recommendations for those who want to truly live up to their potential as leaders and mentors. This book will be essential reading for undergraduate and graduate students in the fields of Psychology, Ethnic Studies, Public Policy, Leadership, and Educational Administration. It is also important reading for leaders and policy makers in organisations dealing with issues around diversity, equity, and inclusion, and anyone interested in promoting social justice.

Psychology and the Social Class Worldview

A Narrative-Based Introduction

Edited by **Anne E. Noonan and William Ming Liu**

This unique textbook explores the complex topic of social class, explaining the many psychological nuances of class and classism in people's lives as subjective and phenomenological experiences. Featuring activity suggestions, discussion questions, and writing prompts to help apply theory to real-life narratives, this is the ideal resource for students and instructors across psychology, sociology, health economics, and social work, as well as anyone taking courses on examining social class.

Prejudice, Identity and Well-Being

Voices of Diversity Among College Students

Edited by **Charles T. Hill**

This essential and timely text looks at the ways in which various identities are socially constructed by students, exploring and comparing multiple dimensions of diverse identities, and the various ways students try to fit in when faced with prejudice and discrimination. Featuring highlighted key concepts and self-reflection sections, as well as further reading, measures, and statistical results, this book is essential not only for undergraduate and graduate students in social psychology, health psychology, sociology, ethnic studies, and social work, but also for therapists, parents, teachers and practitioners running Diversity Training Programs for non-students.

The Social Psychology of Tolerance

Edited by **Maykel Verkuyten**

Series: European Monographs in Social Psychology

This highly topical book is the first of its kind to provide a comprehensive theoretical and empirical discussion of the social psychology of tolerance, exploring the importance and drawbacks of a focus on tolerance and discussing how tolerance can be stimulated in a range of contexts.

Providing a thorough examination of the social psychology of tolerance, this is a valuable text not only to social psychologists but to a range of students and scholars in the social and behavioural sciences more broadly.

TEXTBOOK · READER

Social Psychology and Justice

Edited by **E. Allan Lind**, Duke University, USA

Series: Frontiers of Social Psychology

This volume reviews and extends theory and research on the psychology of justice in social contexts. It examines how people judge whether the treatment they experience with individuals or groups is fair, and shows how this has major consequences for attitudes and behaviors, including the decision to trust or invest emotionally in social relationships and groups.

Incorporating many major theories in social psychology, including groundbreaking work from neuroscience, it brings together two traditionally distinct branches of the discipline: social cognition and interpersonal relations. Finally, it illustrates how justice concepts may be applied in law, government,

business, and medicine.

The Routledge International Handbook of Discrimination, Prejudice and Stereotyping

Edited by **Cristian Tileagă**, **Martha Augoustinos** and **Kevin Durrheim**, University of KwaZulu-Natal, South Africa

Series: Routledge International Handbooks

This handbook explores prejudice, stereotyping and discrimination primarily as phenomena embedded in the social organization of societies and connected to structural factors and larger societal systems. It offers a unique critical, and cross-disciplinary approach to the study of contemporary manifestations of prejudice, stereotyping, and discrimination. This is essential reading for anyone interested in prejudice, discrimination and stereotypes. It will be accessible to academics and researchers interested in both the quantitative and qualitative study of discrimination, inequality and social exclusion.

STUDENT REFERENCE

The Psychology of Democracy

Darren G. Lilleker and Billur Aslan Ozgul

Series: The Psychology of Everything

This book explains the psychological underpinnings behind why people engage with and participate in politics. Covering the influence that political campaigns and media play, it analyses real-world political events including the Trump administration, Brexit, the Arab Spring, and Gezi Park, taking the reader on a journey from engagement with a political news item all the way through to taking to the streets to protest government policy and action. In an age of post-truth and populism, this book shows us how a strong democracy depends upon the feelings and emotions of its citizens, from trust, belonging, empowerment and representation, as much as on electoral

processes.

Interdisciplinary Perspectives on Colorism

Beyond Black and White

Ronald E. Hall, Professor, School of Social Work, Michigan State University

This timely and unique book explores the concept of colorism, which is discrimination based on the color of a person's skin, in a world where arguably light skin is privileged over dark, and one's wealth, health, and opportunities are impacted by skin color, sometimes irrespective of one's racial background.

In the context of our multi-cultural and increasingly global society, and the historical backdrop of slavery, the text takes a unique approach by moving from personal anecdotes to adopting a scientific perspective grounded in empirical evidence.

Child Abuse and Neglect

Monica L. McCoy, Converse College, South Carolina, USA and Stefanie M. Keen, University of South Carolina Upstate, USA

This text examines child abuse and neglect—the latest research, what maltreatment entails, and how to recognize and report it. Different forms of maltreatment—physical abuse, neglect, psychological maltreatment, sexual abuse, fetal abuse, and Munchausen by Proxy Syndrome—are then examined, along with resiliency, in a new chapter to this edition. The text also reviews legal issues and forensic interviewing, and it concludes with suggestions for preventing child maltreatment. Engaging

learning tools are integrated throughout, including Focus on Research boxes, Case Examples and Debates, and Resource Boxes.

Introduction to Family Processes

Diverse Families, Common Ties

Denise Ann Bodman, Arizona State University, USA, Bethany Bustamante Van Vleet, Arizona State University, USA and Randal D. Day, Brigham Young University, USA

Introduction to Family Processes: Diverse Families, Common Ties serves to provide an explanation of the complex workings of inner family life. The text primarily focuses on family processes and dynamics (the "inside" of families) as opposed to sociological trends, political topics, or the individual psychological approach.

This edition has been updated to include current research and contemporary topics. The text has been divided into four parts and a new chapter, titled "Forgiveness, Kindness, Hope and Gratitude" has been incorporated to amplify positive family

processes and highlight emerging research.

Theories of Human Development

Barbara M. Newman, University of Rhode Island, USA and Philip R. Newman, University of Rhode Island, USA

Eleven theories of human development that continue to guide research and practice are examined in this engaging text. The theories are grouped into three families: those that emphasize biological systems, those that focus on environmental factors, and those that reflect an interaction between the two. Discussion of each theory includes the cultural/historical context during the theory's development, key concepts and ideas, extensions of the theory in new directions, a research example, an example of how the theory is applied in contemporary practice, and an analysis of how the theory answers six basic questions that a

theory of human development should address.

Adolescent Portraits

Identity and Challenges

Edited by Andrew C. Garrod and Robert Kilkenny

Adolescent Portraits introduces contemporary theories and research that surround adolescent development today through 18 first-person accounts written by young adults. The case study approach of the book illustrates the complexity of the individual experience and the interactions among an individual's needs, ideas, relationships, and context. With contributions from adolescents from a range of racial, class, and family backgrounds, the book provides a diverse introduction to the adolescent experience. It is a must-read for any student of adolescent development.

Research Foundations of Human Development and Family Science

Science versus Nonsense

Kathleen D. Dyer

Research Foundations of Human Development and Family Science is a textbook that provides an introduction to the diverse scientific research methods that form the foundation of scholarship and practice in HDFS. Illustrated throughout with studies foundational to the discipline as examples of the strategies described in the text, this book is a comprehensive, accessible core textbook for undergraduate research methods classes in HDFS. It introduces the discipline of HDFS and challenges students to understand the limitations of common sense and the threat of pseudoscience for those work professionally with children and families.

Journeys through Emerging Adulthood

An Introduction to Development from Ages 18-30 Around the World

Alan Reifman

Journeys through Emerging Adulthood takes the reader on a tour of contemporary transitions to adulthood, reporting on the latest cross-national and cross-cultural research into young adulthood. Featuring end-of-chapter summaries, quizzes and activities, this text provides an accessible yet comprehensive overview of this significant life stage, connecting fundamental psychological theories with modern social phenomena. Reifman's text is essential reading for both undergraduate and graduate students of psychology, human development and sociology, as well as students and researchers of any discipline interested in the path to adulthood.

Moral Development

Theory and Applications

Elizabeth C. Vozzola, Saint Joseph College, CT, USA and Amie K. Senland

Moral Development offers a comprehensive overview of classic and current theories of moral development and applications of these theories in various counseling and educational settings. Ideal as a text for advanced courses on moral development and moral psychology, as well as courses on human, child, social and personality development taught in psychology, counseling, education, human development, family studies, social work, and religion. Its applied approach also appeals to mental health and school counselors.

3rd Edition • NEW EDITION

Handbook of Moral Development

Edited by Melanie Killen and Judith G. Smetana

This volume is the definitive source of theory and research on the origins and development of morality in childhood and adolescence. It explores morality as fundamental to being human and enabling individuals to acquire social norms and develop social relationships that involve cooperation and mutual respect. Containing contributions from 60 scholars in developmental science, social neuroscience, comparative and evolutionary psychology, and education, this book will be essential reading for scholars, educators, and students in the field of moral development as well as social scientists, public health experts, and clinicians who are concerned with children and

development.

Evidence-Based Policymaking

Envisioning a New Era of Theory, Research, and Practice

Karen Bogenschneider, University of Wisconsin, Madison, USA and Thomas Corbett

Evidence-Based Policymaking takes a fresh look into what policymakers and the policy process are like, as told by policymakers themselves and the researchers who study and work with them. This second edition features the perspective of policymakers from a remarkable new study of 225 state legislators, a new theory on why policymakers use research, a new chapter on pioneering researchers who have been effective in engaging diverse policymakers for different purposes using disparate methods, and a new chapter that lays out a rationale for transforming the education of the next generation of

researchers.

The Development of Memory in Infancy and Childhood

Edited by Mary L. Courage, Memorial University of Newfoundland, Canada and Nelson Cowan, University of Missouri

This fully updated volume expands on the previous edition and offers new research on significant themes and ideas that have emerged in the past decade such as the cognitive neuroscience of memory development, autobiographical memory and infantile amnesia, and the cognitive and social factors that underlie memory for events. Including new topics such as spatial representation and spatial working, prospective memory, false memories, and memory and culture, this volume will appeal to senior undergraduate and graduate students of developmental and cognitive psychology, as well as to developmental

psychologists who want a compendium of key topics in memory development.

TEXTBOOK • READER

Theory of Mind in Middle Childhood and Adolescence

Integrating Multiple Perspectives

Edited by Rory T. Devine and Serena Lecce

From leading international experts, this landmark text explores how the neural, cognitive and social changes of middle childhood and adolescence shape ongoing development of theory of mind, and how theory of mind helps children navigate life. It considers three key themes: Biological and cognitive bases of theory of mind; how theory of mind is shaped by social experiences; atypical development and youth mental health in middle childhood and adolescence. It offers in depth understanding for all students of developmental and cognitive psychology, neuroscience, clinical psychology and psychiatry, and education, and identifies an agenda for future scholarship on this exciting topic.

2nd Edition

Developments

Child, Image, Nation

Erica Burman

How does developmental psychology connect with (what used to be called) the developing world? What do cultural representations indicate about the contemporary politics of childhood? How is concern about child sexual exploitation linked to wider securitization anxieties? In other words: what is the political economy of childhood, and how is this affectively organized? This new edition of *Developments: Child, Image, Nation*, fully updated, is a key conceptual intervention and resource, reflecting further on the contexts and frameworks that tie children to national and international agendas.

Handbook of Integrative Developmental Science

Essays in Honor of Kurt W. Fischer

Edited by **Michael F. Mascolo**, Merrimack College, Andover, Massachusetts, USA and **Thomas R. Bidell**

The *Handbook of Integrative Developmental Science* explores how dynamic skill theory can be employed to further advance theory and research in developmental science. Few models today speak so systematically to both the invariant organization and dynamic variability of development, and none rival dynamic skill theory's unique juxtaposition of breadth and precision at the theoretical, methodological, and analytical levels. This handbook brings together a diverse collection of essays that not only illustrate the comprehensive scope of dynamic skill theory, but also forge new research directions for the field.

The Routledge International Handbook of Shared Parenting and Best Interest of the Child

Edited by **José Manuel de Torres Perea**, Edward Kruk and **Margarita Ortiz-Tallo**

This interdisciplinary volume offers international perspectives on the crucial question of whether the Best Interest of the Child should be the primary consideration to decide child custody cases in case of divorce or separation, or whether it should be one of a range of primary considerations. With expert contributions from psychological, sociological and legal perspectives, it explores complex dilemmas inherent in shared custody and whether the advantages it offers children are sufficient. It will be essential reading for scholars and graduate students in law, psychology, sociology, and economics interested in shared parenting and family law.

Parenting Across Cultures from Childhood to Adolescence

Development in Nine Countries

Edited by **Jennifer E. Lansford**, **W. Andrew Rothenberg** and **Marc H. Bornstein**

Series: Studies in Parenting Series

This vital volume advances understanding of how parenting changes or remains the same from childhood to adolescence in diverse cultural contexts. Revealing the Parenting Across Cultures project, it analyses annual interviews with parents and children in nine countries. It offers insight into trajectories of parenting, exploring parents' warmth, control, setting rules, and knowledge of children's activities and whereabouts. Expert authors based in the countries examined, provide researchers and students of psychology, human development, family studies, sociology, and cultural anthropology, as well as professionals working with families, with a truly global understanding of parenting.

Designing Evidence-Based Public Health and Prevention Programs

Expert Program Developers Explain the Science and Art

Edited by **Mark E. Feinberg**

Demonstrating that program development is as much art as science, this book brings together expert program leaders to give practical principles for developing effective prevention curricula. It covers programs addressing a range of physical, mental, and behavioral health problems, including ones targeting families, specific populations, and developmental stages. Readers will learn how to: select content or targets based on existing research; initiate, reinforce, and generalize behavior change; and refine a curriculum.

Inspiring Motivation in Children and Youth

How to Nurture Environments for Learning

David A. Bergin

Series: Applying Child and Adolescent Development in the Professions Series

Inspiring Motivation in Children and Youth explores motivation and its crucial role in promoting well-being in the classroom and life beyond school. It will help those who work with children and youth to understand and improve their motivation, and to create nurturing environments for younger people. This book is for students looking to excel in a psychological, educational, health, or social work setting, as well as professionals in the field, and parents. It is targeted for people who work or plan to work with children from pre-school to high school and will be useful to teachers, youth leaders, coaches, counselors, social workers, and nurses.

Developmental Play Assessment for Practitioners (DPA-P) Guidebook and Training Website

Project Play

Karin Lifter, Emanuel J. Mason, Amanda M. Cannarella and Ashley D. Cameron

Developmental Play Assessment for Practitioners (DPA-P) Guidebook and Training Website: Project Play offers a comprehensive assessment of naturally occurring play activities for evaluating young children's developmental progress accurately, so that useful interventions can take place as early as possible. It will be of great benefit for early intervention personnel, speech-language pathologists, physical therapists, occupational therapists, and school psychologists.

FINITUDE: The Psychology of Self and Time

Philippe Rochat

Philippe Rochat's *FINITUDE* is a rumination on time and self-consciousness. It is built around the premise that finitude and separation form the human self-conscious reality of time. It argues that we need to reclaim time from current theories in physics that tend to debunk time as an illusion, or state that time simply does not exist. Offering an overarching understanding of concepts beyond methodological detail of the development of self and time, this book will be essential reading for all advanced students and researchers interested in the psychology of time, and the development of self.

The Myth of Attachment Theory

A Critical Understanding for Multicultural Societies

Heidi Keller

The Myth of Attachment Theory confronts the uncritical acceptance of attachment theory — challenging its scientific basis and questioning the relevance in our modern, superdiverse and multicultural society — and exploring the central concern of how children, and their way of forming relationships, differ from each other. This volume will be a crucial read for scholars and researchers in developmental, educational and clinical psychology, as well as educators, teachers-in-training and other professionals working with children and their families.

Multidisciplinary Perspectives on the Psychology of Exclusion

From Rejection to Personal and Social Harmony

Agnieszka Wilczyńska

This new volume considers one of the most pressing topics of a generation, the sense of social exclusion, rejection and loneliness experienced by many adolescents and young adults. It offers insights from psychological and biochemical research, explains the role of the brain, mind and body in the development of a sense of belonging over the lifespan. Illustrated with examples of the consequences of exclusion drawn from the author's clinical work, it surveys the latest research in the field and introduces an innovative framework for understanding the development of the sense of belonging.

Cultures of Infancy

Heidi Keller

Series: *Psychology Press & Routledge Classic Editions*

The Classic Edition of Heidi Keller's *Cultures of Infancy*, first published in 2007, includes a new introduction by the author, describing for readers the original context for her work, how she has further developed her research and thinking, and the ongoing relevance of this volume in the context of future challenges for the field. With distinct patterns of results the studies have revealed, *Cultures of Infancy* helps redefine developmental psychology as part of a culturally informed science based on evolutionary groundwork. Scholars interested in a broad perspective on human development and culture will benefit from this pioneering volume.

Psychological Modeling

Conflicting Theories

Edited by **Albert Bandura**

Series: *Psychology Press & Routledge Classic Editions*

This classic text highlights the most important work done in the subject of learning by modelling and offers an extensive review of the major theories, edited by one of the most influential psychologists of his generation. In his introductory essay, Bandura identifies the most important issues in the field of observational learning and reviews a large body of research findings, before carefully chosen articles tackle debates around modelling influences, reinforcement play, and the relative effectiveness of various presentation methods on models. This book will be of interest to all psychology students interested in psychological modelling, as well as educators and professionals.

Self and Story in Early Childhood

Children's Developing Minds Revealed by Parent-led Research

Hugh Crago, Australian Catholic University and University of Western Sydney, Australia

In this book, the Hugh Crago brings out the implications of previously unpublished parent-led research to highlight how much children can achieve without formal teaching, but with the supportive presence of a trusted adult who will participate with them in the story experience. This book will be of great interest to scholars of developmental psychology, early literacy and narratology, as well as to professionals working with preschoolers. Most of all, it will fascinate parents who themselves share stories with their child.

TEXTBOOK · READER

The Development of Empathy

Phenomenology, Structure and Human Nature

Edited by **Larysa Zhuravlova** and **Oleksiy Chebykin**

This thought-provoking volume offers psychological perspectives on the formation of empathy and how this determines both antisocial and prosocial behaviors in individuals. It offers a theoretically grounded and empirically proven integrated approach, helping readers gain a holistic understanding of human nature, and the need for empathic interaction between people. Considering a vision for a society based on empathic relationships, which could be a deterrent to discrimination, help resolve problems of environmental issues, harmonize interpersonal relationships and resolve conflict, this new text is for advanced students of developmental, and educational psychology.

Youth Without Family to Lean On

Global Challenges and Local Interventions

Edited by **Moshe Israelashvili** and **Shula Mozes**

Youth Without Family to Lean On draws together interdisciplinary, global perspectives to provide a comprehensive review of the characteristics, dynamics, and development of youth (aged 15-25) who have no family to lean on, either practically or psychologically. This book is essential reading for those in psychology, sociology, public health, social work, law, criminology, public policy, economics, and education and is highly enriching for scholars and practitioners, as well as higher education students, who wish to understand and help the gradually increasing number of youth who are forced, too early, to manage their life alone.

The Psychology of Job Interviews

Nicolas Roulin

Most people, at some point in their lives, experience the stress of being interviewed for a job. Many also face the task of interviewing other people. But what does the science tell us about this unique social situation? What biases are involved, and how can we become aware of them? And how can job interviews be structured so that they are fair and effective? Debunking several popular myths along the way, this is essential reading for anyone interested in understanding what is really happening in a job interview, whichever side of the desk you are sitting.

Advances in Theory, Methods, and Practice

Edited by Hannes Zacher and Cort W. Rudolph

Series: *SIOP Organizational Frontiers Series*

The edited volume, *Age and Work* presents a systematic collection of key advances in theory, methods, and practice regarding age(ing) and work. This leading-edge collection breaks new ground by developing novel and useful theory, explaining underutilized but important methodological approaches, and suggesting original practical applications of emerging research topics. Written in a scientific yet accessible manner, the book offers a valuable resource for undergraduate and graduate students, academics in the fields of psychology and business, as well as practitioners working in the areas of human resource management and organizational development.

A Psychoanalytical Critique

Bénédicte Vidaillet

Developing a critical reflection from a psychoanalytic perspective, *Evaluation at Work: A Psychoanalytical Critique* argues that workers are not mere victims of evaluation systems but are complicit in them. This book will be of interest to scholars studying the topic of evaluation at work from a critical perspective as well as professionals who use evaluation systems or are under the pressure of evaluation in all sectors and organizations. By exposing the psychological mechanisms that evaluation uses to appeal to us, it gives each of us the tools we need to break free of its grasp.

Neurodiversity in the Workplace

Interests, Issues, and Opportunities

Edited by **Susanne M. Bruyère** and **Adrienne Colella**
Series: SIOP Organizational Frontiers Series

Neurodiversity in the Workplace presents a timely and needed perspective on the many ways we preclude large segments of the population from employment. This volume is intended to increase awareness about the challenges and opportunities in making the workplace more neurodiversity inclusive, making it instrumental for I/O and other psychologists. This book is also crucial for management and business consultants; employers; diversity, equity, and inclusion specialists; human resource professionals; and others interested in neurodiversity inclusion more broadly.

TEXTBOOK - READER

Essentials of Occupational Health Psychology

Edited by **Christopher J. L. Cunningham**, The University of Tennessee at Chattanooga, USA and **Kristen Jennings Black**, The University of Tennessee at Chattanooga, USA

Series: Essentials of Industrial and Organizational Psychology

Essentials of Occupational Health Psychology provides a thorough overview of Occupational Health Psychology (OHP) with a focus on empowering readers to take appropriate and reasoned action to address a wide variety of worker health, safety, and well-being challenges that are present in working situations all over the world. This book is valuable to graduate and advanced undergraduate students as well as working professionals. The chapters in this text could also provide supplemental reading for training and development workshops for professionals in related disciplines who could benefit from a better understanding of the psychology associated with work experiences.

How Groups Encourage Misbehavior

Kevin R. Murphy

Series: Applied Psychology Series

How Groups Encourage Misbehavior explores the psychological and social processes by which groups develop a tolerance for and even encourage misbehavior. Drawing from decades of research on social, cognitive and organizational psychology, as well as a deep well of historical research, this book shows how commitment to groups, organizations and movements can turn moral individuals into amoral agents. This valuable text will especially appeal to practitioners, scholars, and students interested in ethics in organizations and the intersection between social psychology and organizational behavior.

Understanding Trust in Organizations

A Multilevel Perspective

Edited by **Nicole Gillespie**, University of Queensland, Australia, **C. Ashley Fulmer**, University of Iowa, USA and **Roy J. Lewicki**, The Ohio State University, USA
Series: SIOP Organizational Frontiers Series

Understanding Trust in Organizations examines trust within organizations from a multilevel perspective, bringing together internationally renowned trust scholars to advance understanding of how trust is affected by both macro and micro forces, such as those operating at the societal, institutional, network, organizational, group, team, and individual levels. Providing rich and nuanced insights on how to develop, maintain, and restore trust in the workplace, this book is a critical

resource for scholars, graduate students, and researchers of Industrial and Organizational Psychology, as well as practitioners in fields such as Human Resource Management.

Fostering the Mental Health of Athletes, Coaches, and Staff

A Systems Approach to Developing a Mentally Healthy Sport Organization

Charles A. Maher, Graduate School of Applied & Professional Psychology, Rutgers University

This book describes a systems approach for fostering the mental health of athletes, coaches, and staff in sport organizations at professional, collegiate, and secondary school levels. Through this approach, readers can collaborate effectively with a range of professionals in sport organizations, helping to create a mentally healthy entity. Through its unique and important nature and scope, this book is essential for licensed sport, clinical, and counseling psychologists as well as other professionals who communicate and collaborate regarding mental health, including mental performance consultants, athletic trainers, and administrators.

TEXTBOOK · READER

Forensic Psychology

Edited by **Neil Gredecki**, Alpha Hospitals and Manchester Metropolitan University, UK and **Polly Turner**

Series: Topics in Applied Psychology

Drawing on psychological theory and research, this text outlines the core roles of the forensic psychology profession, providing students with a broad overview of the field and bringing to life the work of the forensic psychologists. Written by leading UK practitioners and researchers working in a range of contexts, it invites students to reflect on how psychological literature helps us to understand people in contact with the justice system. As such, this volume details the contribution of forensic psychology to a range of presentations and organizational and professional issues, and is an ideal resource for courses in Forensic Psychology.

Stopping Gender-based Violence in Higher Education

Policy, Practice, and Partnerships

Edited by **Clarissa J. Humphreys** and **Graham J. Towl**

Stopping Gender-based Violence in Higher Education provides a unique insight into gender-based violence at universities and outlines the path toward tangible changes to prevent it. Bringing together perspectives from activists, practitioners, and university administrators, the book presents a diverse range of voices to constructively critique the field. It is an essential resource for professionals, academics, and students in Higher Education, as well as indispensable reading for activists, policy makers, police, rape crisis groups and other organizations supporting these universities to make meaningful change in responding to and preventing gender-based violence.

Trauma-Informed Forensic Practice

Edited by **Phil Willmot** and **Lawrence Jones**

Series: Issues in Forensic Psychology

This book is the first to present a trauma-informed approach to forensic practice with young people and adults. It describes the current evidence and understanding of the links between trauma, adversity and offending, presents a trauma-informed framework for formulating offending and institutional behaviour, diagnoses and risk factors. This book is written by forensic practitioners and service users and is intended both for practitioners working to develop trauma-informed forensic services, and for academics and students interested in studying this developing area of forensic practice.

Global Perspectives on Interventions in Forensic Therapeutic Communities

A Practitioner's Guide

Edited by **Geraldine Akerman** and **Richard Shuker**, HM Prison Grendon, UK

Series: Issues in Forensic Psychology

Global Perspectives on Interventions in Forensic Therapeutic Communities: A Practitioner's Guide explores the validity and effectiveness of secure settings as therapeutic communities (TCs). Rooted in practice, this book examines the transferability of approaches within international TCs to other forensic settings, while considering how the environment contributes to effectiveness. This ground-breaking book is valuable reading for forensic and clinical psychologists, counsellors, social workers, and psychiatrists working in secure prison or rehabilitation

settings, as well as students in these fields.

Working with Autistic People in the Criminal Justice and Forensic Mental Health Systems

A Handbook for Practitioners

Edited by **Nichola Tyler** and **Anne Sheeran**

Series: Issues in Forensic Psychology

Working with Autistic People in the Criminal Justice and Forensic Mental Health System: A Handbook for Practitioners is the first book to focus specifically on the best practice for working with autistic people in criminal justice and forensic mental health settings. Integrating current theory, research, and clinical practice, this book provides a practical guide for multidisciplinary practitioners working with autistic people who have offended. This book appeals to a wide audience within the fields of psychology, psychiatry, nursing, occupational therapy, speech and language therapy, as well as criminal justice staff (e.g., prison and probation).

New Perspectives on Arson and Firesetting

The Human-Fire Relationship

Faye K. Horsley

Series: New Frontiers in Forensic Psychology

New Perspectives on Arson and Firesetting is the first forensic text to move away from a sole focus on anti-social fire setting. The author presents a broader investigation of the role of fire in human life with a view to informing research and practice. The forensic scope, applied focus, and emphasis on the importance of interdisciplinary research and practice makes this book essential reading for students in fields such as anthropology, sociology, criminology, and psychology, as well as interdisciplinary scholars, forensic practitioners, and allied professionals.

A Casebook of Mental Capacity in US Legislation

Assessment and Legal Commentary

Edited by Lynn A. Schaefer, Nassau University Medical Center, N.Y. and Thomas J. Farrer, Duke University Medical Center, Durham, NC

A Casebook of Mental Capacity in US Legislation: Assessment and Legal Commentary employs an applied and accessible approach to the assessment of mental capacity. Through the use of rich vignettes and case examples, the text provides legal commentary to illustrate state laws and ethical principles from varied decision-making capacities in distinct settings to fortify its assessment.

The case presentations and legal commentary underline key areas such as the capacity to consent to medical treatment,

make welfare decisions, enter into a sexual relationship, make financial decisions, make or revoke a will, litigate and make a contract, and stand a trial.

A Handbook of Geriatric Neuropsychology

Practice Essentials

Edited by Shane S. Bush and Brian P. Yochim

Series: Studies on Neuropsychology, Neurology and Cognition

A Handbook of Geriatric Neuropsychology brings together experts in the field to integrate the knowledge and skills needed to understand and treat older adults who are experiencing problems with memory and other thinking skills. This book is a go-to resource for psychologists who serve older adults with known or suspected cognitive problems, as well as those who are invested in promoting brain wellness. It provides the information needed to establish and improve functional competencies in geriatric neuropsychology and establish practices that are personally and professionally rewarding, all aimed at promoting the understanding and wellbeing of older

adults.

A Neuropsychologist's Guide to Training Psychometrists

Promoting Competence in Psychological Testing

Christine S. Ghilain

A Neuropsychologist's Guide to Training Psychometrists: Promoting Competence in Psychological Testing provides a framework for busy neuropsychologists faced with training their newly-hired psychometrist. It supplies concrete guidelines and provides a roadmap for training that can be customized to any practice, department, or clinic setting. This book is an indispensable guide for neuropsychologists looking to instill high standards of competence in their hired professionals, and for those involved in training graduate students who are just learning to administer cognitive tests.

Cultural Diversity in Neuropsychological Assessment

Developing Understanding through Global Case Studies

Edited by Farzin Irani

The handbook provides a platform for professionals to bridge cultures and speak to each other about the ethnically diverse communities they serve throughout the world. It allows readers to examine how they worked with diverse individuals from indigenous and migrant communities.

It provides an invaluable clinical resource for neuropsychologists, psychologists, and trainees. It increases self-reflection about multicultural awareness and knowledge, highlights practical ways to provide culturally aware neuropsychological and psychological assessments, and sparks further discussion for professional and personal growth in this area.

Understanding Cross-Cultural Neuropsychology

Science, Testing, and Challenges

Edited by Alberto Luis Fernández and Jonathan Evans

Series: Current Issues in Neuropsychology

This book thoroughly examines the meaning of culture in the context of neuropsychology, focusing on the fundamental neuroscience underlying how different aspects of culture influence neuropsychological test performance, and how that is related to brain functioning. This book is essential reading for neuropsychologists and related practitioners working with culturally diverse clients, who need a good grasp of the cultural impacts on neuropsychological test performance when assessing clients from different cultural, linguistic, and educational backgrounds.

Sleep and Brain Injury

Crawford M. Thomas

This ground-breaking book binds together a contemporary understanding of sleep and brain injury, pairing empirical understanding through clinical practice with extensive up-to-date research, to provide a deeply considered approach to these overlapping topics. This new approach highlights how sleep can affect the specific functional effects of brain injury and how brain injury can exacerbate some of the specific functional effects of sleep problems, thus having the potential to transform the field of neurorehabilitation. It is essential reading for professionals working with brain injury and postgraduate students in clinical neuropsychology.

Clinical Disorders of Social Cognition

Edited by Skye McDonald

The book provides contemporary neuroscientific theories of social cognition in a wide range of conditions across the lifespan. Taking a trans-diagnostic approach to understanding these disorders, it discusses how they present in different conditions, ranging from brain injury to neurodevelopmental disorders and psychiatric conditions. It is essential reading for clinicians who work with people with clinical disorders. It will also appeal to students and professionals in Clinical Neuropsychology, Speech and Language Pathology and researchers who are interested in learning more about the social brain and understanding how evidence from clinical conditions can inform this.

Reconstructing Identity After Brain Injury

A Search for Hope and Optimism After Maxillofacial and Neurosurgery

Stijn Geerincx

Series: After Brain Injury: Survivor Stories

This book tells the remarkable story of Stijn Geerincx and his journey from road traffic accident to recovery. After he was hit by a drunk driver whilst cycling, Stijn suffered a traumatic brain injury and had to undergo drastic maxillofacial and neurosurgery. In his own words, this book narrates his difficult recovery, focusing on the physical, medical, mental, social and financial changes he had to endure. It is essential reading for any professional involved in neuropsychological rehabilitation, and all those touched by this condition.

The Psychology of Cardiovascular Illness

Interventions, Ethics, and Best Practice

Mark P. Blanchard and Steven Abell

This important book shows those working with clinical populations how to develop an understanding of the psychology of patients with cardiovascular problems to support appropriate medical care. Based on the latest research, this book offers suggestions about how to approach cardiovascular disease holistically in multidisciplinary medical settings. This book will be of interest to anyone interested in furthering their knowledge about the complex interplay between cardiovascular problems and mental health conditions, especially clinical health psychologists who collaborate with social workers, primary care physicians, cardiologists, and surgeons alike.

A Breast Cancer Guide For Spouses, Partners, Friends, and Family

Using Psychology to Support Those We Care About

Stephen N. Haynes, Luanna H. Meyer and Ian M. Evans

This practical, science-based book focuses on helping partners, family and friends understand breast cancer. It guides them in how to provide the best emotional and practical support when helping someone with breast cancer to cope, recover and thrive, while maintaining their own physical and psychological health. It is essential reading for all those who want to help and support a loved one with breast cancer. It is also useful for training healthcare professionals in how to support partners.

Evaluating the Brain Disease Model of Addiction

Edited by Nick Heather, Matt Field, Antony C. Moss and Sally Satel

This ground-breaking book advances the fundamental debate about the nature of addiction. As well as presenting the case for seeing addiction as a brain disease, it brings together all the most cogent and penetrating critiques of the brain disease model of addiction (BDMA) and the main grounds for being skeptical of BDMA claims. The result is a landmark volume in the study of addiction which will be essential reading for advanced students and researchers in addiction as well as professionals such as medical practitioners, psychiatrists, psychologists of all varieties, and social workers.

Selling Immunity Self, Culture and Economy in Healthcare and Medicine

Mark Davis

Series: Critical Approaches to Health

Selling Immunity: Self, Culture and Economy in Healthcare and Medicine studies the ways in which immunity shapes life. Through its up-to-date discussion of immunity cultures, alongside detailed real-world examples, the book demonstrates how immunity is enmeshed in concepts of possessive individualism, self-defence and health consumerism. This book is essential reading for professionals within the fields of psychology, sociology, biomedical science, healthcare and other related disciplines. A broader audience will appreciate the book's attention on the ways immunity is understood to be a personal possession, an object of life craft, and the basis for healthcare

consumerism.

Statistics in Plain English

Timothy C. Urdan, Santa Clara University

Statistics in Plain English is a straightforward, conversational introduction to statistics that delivers exactly what its title promises. Each chapter begins with a brief overview of a statistic that describes what the statistic does and when to use it, followed by a detailed step-by-step explanation of how the statistic works and exactly what information it provides. Chapters also include an example of the statistic (or statistics) in use in real-world research, "Worked Examples," "Writing It Up" sections that demonstrate how to write about each statistic, "Wrapping Up and Looking Forward" sections, and practice work problems.

Network Psychometrics with R

A Guide for Behavioral and Social Scientists

Edited by Adela-Maria Isvoranu, Sacha Epskamp, Lourens Waldorp and Denny Borsboom, University of Amsterdam

A systematic, innovative introduction to the field of network analysis, *Network Psychometrics with R: A Guide for Behavioral and Social Scientists* provides a comprehensive overview of and guide to both the theoretical foundations of network psychometrics as well as modelling techniques developed from this perspective. Written by pioneers in the field, this textbook showcases cutting-edge methods in an easily accessible format, accompanied by problem sets and code. It is ideal for instructors and students of undergraduate and graduate level courses and workshops in the field of network psychometrics as well as

established researchers looking to master new methods.

A Beginner's Guide to Structural Equation Modeling

Tiffany A. Whittaker and Randall E. Schumacker, University of Alabama, USA

A Beginner's Guide to Structural Equation Modeling, fifth edition, has been redesigned with consideration of a true beginner in structural equation modeling (SEM) in mind. The book covers introductory through intermediate topics in SEM in more detail than in any previous edition. This book is intended for true beginners in structural equation modeling and is designed for introductory graduate courses in structural equation modeling taught in psychology, education, business, and the social and healthcare sciences. This book also appeals to researchers and faculty in various disciplines. Prerequisites include correlation

and regression methods.

Detection Theory

A User's Guide

Michael J. Hautus, University of Auckland, New Zealand, Neil A. Macmillan, University of Massachusetts Amherst and C. Douglas Creelman

Detection Theory: A User's Guide is an introduction to one of the most important tools for the analysis of data where choices must be made, and performance is not perfect. In these cases, detection theory can transform judgments about subjective experiences, such as perceptions and memories, into quantitative data ready for analysis and modeling. This modern summary of signal detection theory is both a self-contained reference work for users and a readable text for graduate students and researchers learning the material either in courses or on their

own.

Interpreting Statistics for Beginners

A Guide for Behavioural and Social Scientists

Vladimir Hedrih and Andjelka Hedrih

Interpreting Statistics for Beginners teaches readers to correctly read and interpret results of basic statistical procedures as they are presented in scientific literature, and to understand what they can and cannot infer from such results.

Written in an easy-to-read style and focusing on explaining concepts behind statistical calculations, the book is most helpful for readers with no previous training in statistics, and also those wishing to bridge the conceptual gap between doing the statistical calculations and interpreting the results.

The Method of Multiple Hypotheses

A Guide for Professional and Academic Researchers

Charles S. Reichardt

This book illustrates the method of multiple hypotheses with detailed examples and describes the limitations facing all methods (including the method of multiple hypotheses) as the means for constructing knowledge about nature. The author also explicates some of the most foundational ideas in philosophy of science including the notions of the underdetermination of theory by data, the Duhem-Quine thesis, and the theory-ladenness of observation. This book will be important reading for advanced undergraduates, graduates, and professional researchers across the social, behavioral and natural sciences wanting to understand this method and how to apply to their field of interest.

Introduction to Theory-Driven Program Evaluation

Culturally Responsive and Strengths-Focused Applications

Stewart I. Donaldson

Introduction to Theory-Driven Program Evaluation provides a clear guide for practicing evaluation science, and numerous examples of how these evaluations actually unfold in contemporary practice. A special emphasis is placed on how to conduct theory-program evaluations that are culturally responsive and strengths-focused. The volume is of significant value to practicing evaluators, professors of introductory evaluation courses and their students, advanced undergraduate and graduate students, and serves as a text or a supplementary text for a wide range of evaluation and applied research courses.

STUDENT REFERENCE

A Journey into Open Science and Research Transparency in Psychology

Jon Grahe

A Journey into Open Science and Research Transparency in Psychology introduces the open science movement from psychology through a narrative that integrates song lyrics, National Parks, and concerns about Diversity, Social Justice, and Sustainability. Along the way, readers receive practical guidance on how to plan and share their research matching the ideals of Scientific Transparency. This short book is intended as a supplemental text for research methods courses or just a fun and informative exploration of the fundamental topics associated with the "Replication Crisis in Psychology" and the resulting movement to increase scientific transparency in methods.

Hermeneutic Approaches to Interpretive Research

Dissertations In a Different Key

Edited by Philip Cushman

Series: *Advances in Theoretical and Philosophical Psychology*

This unique and insightful book brings together a collection of impactful essays written by former psychology doctoral students that feature hermeneutics as a method of qualitative inquiry. This is an illuminating reading for graduate students and scholars curious about the hermeneutic approach to research, particularly those engaged in fields like theoretical psychology, clinical psychology, psychotherapy, mental health, cultural history, and social work.

Psychological Statistics

The Basics

Thomas J. Faulkenberry

Series: *The Basics*

Psychological Statistics: The Basics is an accessible guidebook which will walk the reader through the core logic of statistical inference and provide a solid grounding in the techniques necessary to analyse data in the psychological and behavioural sciences. This is an ideal introduction for first-year undergraduates in the psychological and behavioural sciences (including neuroscience), as well as A-level and high school students approaching psychological statistics for the first time.

The Student Survival Guide for Research Methods in Psychology

Ross A. Seligman and Lindsay A. Mitchell

An accessible and useful primer text for all psychology students undertaking research methods courses which will be particularly helpful for new undergraduate students. The authors present clear step-by-step instructions which will help students hone the basic tools to succeed and thrive in their research methods classes and navigate common pitfalls. The book covers core practical skills, like formatting and writing at an APA standard, understanding research literature (particularly academic journals), using SPSS, and broader skills like how to communicate with your professor, time management and teamwork skills.

Introductory Psychology in Modules

Understanding Our Heads, Hearts, and Hands

**Brett Pelham and David Boninger**

Introductory Psychology in Modules: Understanding Our Heads, Hearts, and Hands is a unique and comprehensive introduction to psychology. It consists of 36 short modules that keep students engaged with humor, a narrative style, and hands-on activities that facilitate interactive learning and critical thinking. By covering both classic and contemporary topics, this book will delight students and instructors alike. The modular format also makes this a useful supplementary text for classes in nursing, medicine, social work, policing, and sociology.

An Evidence-based Guide to College and University Teaching

Developing the Model Teacher

**Aaron S. Richmond**, Metropolitan State University of Denver, USA, **Guy A. Boysen**, McKendree University, USA and **Regan A. R. Gurung**, University of Wisconsin, USA

An Evidence-based Guide to College and University Teaching outlines a definition of "model teaching" based on research evidence and accepted best practices in high education. Teachers at all levels of skill and experience can benefit from clear, objective guidelines for defining and measuring quality teaching. To fulfil this need, this book outlines six fundamental areas of teaching competency—model teaching characteristics—and provides detailed definitions of each characteristic. The book is useful for teachers, trainers, and administrators responsible for promoting excellence in college

teaching.

An Introduction to Evolutionary Cognitive Archaeology**Thomas Wynn and Frederick L. Coolidge**

An Introduction to Evolutionary Cognitive Archaeology is the first concise introduction that lays out the epistemological foundations of evolutionary cognitive archaeology in a way that is accessible to students. The book includes: a clear definition of cognitive archaeology, explaining the two major 'schools' of thought; the core elements of cognitive archaeological research; and a substantial review of the reason(s) for the extinction of Neandertals, through the lens of cognitive archaeology. It is an essential text for undergraduate students, graduate students, and scholars across the behavioral and social sciences interested in learning about cognitive archaeology.

The Ethical Visions of Psychotherapy

Kevin R Smith

Series: Advances in Theoretical and Philosophical Psychology

The standard view of psychotherapy as a treatment for mental disorders can obscure how therapy functions as a social practice that promotes conceptions of human well-being. Building on the philosophy of Charles Taylor, Smith examines the link between therapy and ethics, and the roots of therapeutic aims in modern Western ideas about living well.

A key text for upper level undergraduates, postgraduate students, and professionals in the fields of psychotherapy, psychoanalysis, theoretical psychology, and philosophy of mind.

William James's Pluralism

An Antidote for Contemporary Extremism and Absolutism

Wayne Viney

William James's Pluralism: An Antidote for Contemporary Extremism and Absolutism explores extremism and the related problem of absolutism in the context of the psychology and philosophy of William James. Written in a non-technical manner to appeal to the general public—just as William James hoped for his pluralistic philosophy—this book is additionally of considerable interest to academics and students across many fields such as psychology, philosophy, history, and sociology.

Hermeneutic Dialogue and Shaping the Landscape of Theoretical and Philosophical Psychology

The Work of Frank Richardson

Edited by **Robert C. Bishop**

Series: Advances in Theoretical and Philosophical Psychology

This volume introduces the methodological value of hermeneutic dialogue in the field of theoretical and philosophical psychology. It reflects on the works of Frank Richardson who has made, and continues to make, seminal contributions to the field, as well as having influenced the work of many of the practitioners engaged in this field today. This book will be a valuable resource for students and scholars of theoretical and philosophical psychology, philosophy of the mind, and personality theories.
