

Taylor & Francis Group
an **informa** business

The Renal Drug Database

The Renal Drug Database will have a **new look starting 12th February**. With the redesign, you'll be able to:

- Search faster – the site will suggest drug names as you type
- Get more results – search will return every place the search term appears, including Important Drug Interactions
- See previous searches – find drugs you commonly search quicker with a list of your previous searches

On **12th February**, you'll need to **reset your password** to access The Renal Drug Database. To do this:

- Click Forgot Password on the new home page
- Enter your username, which will not change
- Check your email for a link to establish your new password

If you share a login with others, please coordinate with them so only one person sets up a new password.

If you have questions, please contact The Renal Drug Database Support team at **rddsupport@tandf.com**.
