

The Renal Drug Database

The Renal Drug Database will have a **new look starting 12th February**. With the redesign, you'll be able to:

- Search faster – the site will suggest drug names as you type
- Get more results – search will return every place the drug is mentioned, including Important Drug Interactions
- See previous searches – find drugs you commonly search for quicker with a list of your previous searches

You'll access the site in the same place:

<http://renaldrugdatabase.com>.

On 12th February, your Renal Drug Database administrator will reset the password. Please do not attempt to log in until you hear from _____

If you have questions, please contact The Renal Drug Database Support team at **rddsupport@tandfonline.com**.
